Hamadi Hair Washes:

Hamadi Hair Washes do not contain sodium laurel sulfate, which other products use to create a "lather" or "suds". Sulfates used in shampoos for its detergent and foam-building abilities can cause eye irritations, skin rashes, hair loss, scalp scurf similar to dandruff, and allergic reactions. Sulfates strip your hair of natural oils and nourishment. Our hair washes use natural sudsing agents derived from coconuts, leaving the hair feeling clean and not heavy with detergents. It takes about 2 weeks after switching to Hamadi organic hair wash for hair and scalp to detoxify chemical build up!

Honey Soymilk Hair Wash adds va-va-va volume to your hair. Honey is a natural healing agent that has been used for thousands of years to clean hair, but also adds texture for modern styles. Gentle for everyday use and safe for color-treated hair. Soy milk proteins seal in moisture while binding with weak hair shafts to strengthen. Also contains soothing organic Ylang Ylang essential oil.

Hamadi Ginger Soymilk Hair Wash is gentle for everyday use and works for all hair types, especially color-treated hair. Organic Ginger and Sweet Orange essential oils stimulate the scalp and invigorate the hair shafts. Organic Rosewood Essential Oil also rejuvenates and regenerates stressed hair. Soy milk proteins bind with shafts to strengthen and seal in moisture.

Hamadi Lemon Mint Hair Wash is a clarifier that removes toxic build up from environmental pollution and styling products while sealing in color. Organic Mint Essential Oils invigorate and stimulate the scalp, especially after damage from color-treatment or lightening. Provides sensational aromatherapy experience in the shower with Peppermint, Green Mint, White Cedar, Lemongrass, Lemon, Grapefruit, and Rosemary organic Essential Oils. Organic Lemon and Grapefruit Essential Oils rebalance hair's natural pH and return shine.

Conditioner:

Hamadi Shea Rice Milk Conditioner nourishes and strengthens any type of hair. Rice milk proteins bond with the hair shafts while Shea Butter nourishes and protects against the sun. Features organic Orange, Rosemary, Sage, and Ylang Ylang essential oils.

Why use an organic conditioner?

According to Ecosalon.com, you should use organic conditioners "to avoid the common ingredient in conventional conditioners called Lauramide DEA. It strips away important amino acids like serine, histamine and other hair and skin proteins. This can leave hair feeling dry and unmanageable - creating the need to use more conditioner. Who knew hair conditioner could be so conspiracy-theory!" <http://www.ecosalon.com/conditioners/>

The Hair Cream also great for men with fans such as James Franco:
