

## Kasia Apothecary Essential Oils

Kasia Organic Salon offers guests Therapeutic Grade Essential Oils for both services and purchase. Kasia oils can be used in hair, skin, body, and other healing modalities.

### ***Did you know?***

***Only 2 percent of essential oils sold in the United States are true Therapeutic Grade?*** True Therapeutic essential oils are immune-system stimulating, anti-viral, anti-infectious, anti-bacterial, anti-microbial, antiseptic, anti-tumoral, anti-fungal and more.

Kasia sources GC/MS tested oils imported from around the world.

***What is GC/MS?*** Gas Chromatography and Mass Spectrometry (GS/MS) analysis are the scientific methods employed to differentiate imposter oils from the real McCoy. Oils purity can be affected by myriad environmental factors: geographical region, altitude, climate, soil, growing conditions, harvest method and season. Even the time of day the plant is harvested can affect the oil's purity!

### **GC/MS Analyzes for:**

- Non-fragrant solvents
- Synthetic fragrance materials and their isomers
- Synthetic “nature identical” essential oil components
- Synthesis by-products
- Expensive oils “cut” with inexpensive oils
- Oxidation products
- Fractional distillation
- Deterpination

***What does this mean to you, the essential oil user?*** Other labels can legally state that they are "PURE," yet they are usually adulterated by some means including Petro-chemicals, nature identicals, and/or fractions of other chemical additives.

***No Additives:*** The primary components of 98% of all essential oils on the market are synthetic and shouldn't be used for therapeutic applications. At best, synthetic oils may not produce desired therapeutic results. At worst, they could be toxic. Many oils labeled “100% pure” are *not*.

### **Kasia Apothecary Essential Oils**

Even “certified organic” oils may not be pure. Unfortunately, some low quality oils actually hide behind the “organic” badge.

#### ***Kasia Organic Salon Guarantee***

*All* essential oils used at Kasia Organic Salon are 100% Pure Therapeutic Grade.

The oils are analyzed in detail frequently, batch by batch, to ensure their purity and quality. They are free of added water, alcohol, carriers or other diluents. No chemical solvents are added during distillation, and nothing is added to the oil after distillation.
